## Wamberal Public School

Term 3 project update

September 2019

### Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

### Wamberal Public School upgrade

A major upgrade is underway at Wamberal Public School to provide new permanent learning spaces. The project will deliver a new homebase building (Block K) including new flexible learning spaces for 15 classes, a new canteen, as well as upgrades to the existing administration area, hall and learning spaces.

A major milestone was reached in Term 3 with the two new learning spaces in Block E being handed over to the school for early use.

### Upcoming work activities

- Removal of some demountables during school holiday period
- Completion of homebase steel structure and roof
- Connection of services to the new homebase

- Sheeting of walls and ceilings in new homebase
- Cladding to external walls in new homebase

We are here to make sure that work is completed safely and efficiently. We will continue to work with the Principal and staff to ensure that disruptions are minimised.

### Relocation of school admin to Block A

The school administration will be relocating back into the upgraded Block A during the September/October school holiday period. Signage will be installed ahead of Day 1 Term 4 to assist with wayfinding.

### September/October school holiday period

The Wamberal Public School site is being leased by YMCA during the upcoming school holidays. Staff are requested not to use the school car park during this period.
