

# Wangi Wangi Public School

## Works notification

May 2019

### Site establishment works

The construction zone for the Wangi Wangi Public School upgrade has been established and the following activities to clear the site will start this week:

- removal of trees which will be impacted by construction
- demolition of the existing administration building. The new temporary administration building will be the access point for the school during construction

Bulk excavation and earthworks will start from Monday 27 May, 2019.

### Removal of contaminated materials

While carrying out site investigations a small amount of potentially contaminated materials have been identified. The area has been secured and appropriate control and monitoring measures have been installed. Further testing will be conducted on Friday 24 May to confirm whether the materials contain asbestos.

If confirmed, the material will be removed by a licensed asbestos removal contractor. The works will be conducted in accordance with the Department of Education's Asbestos Management Plan and Safe Work NSW requirements including the following precautionary measures:

- isolation of the work area
- monitoring, testing and clearance certification by a consultant hygienist

The health, safety and well-being of students, staff and neighbours is our highest priority. We will continue to keep the community updated as more information becomes available.

### Traffic changes

To allow for construction activity to occur at the school, the following traffic changes will be introduced:

- bus drop off bay will be relocated to Puna Road
- construction vehicle zone installed on Beach Road
- kiss and drop zone relocated to Dobell Drive
- emergency vehicle access will be relocated to Puna Road

Work will take place during standard construction hours between 7am and 6pm, Monday to Friday and 8am to 1pm, Saturday. No work will take place on Sundays or public holidays.

## Indicative site layout – Wangi Wangi Public School upgrade
