# CONCEPT | NATURE TRAIL

**PART 1 - TREES**

The nature trail will help to introduce the students to a wider world of environmental awareness and stewardship.

They will begin by learning about endemic tree types and gain an appreciation for some of the endangered and significant species present.

**PART 3 - NATURE PLAY**

Play is bound and surrounded by natural elements creating an immersive bushland style play experience. Students will learn to play using the natural undulation of the land building strength and creativity through engaged play.

**PART 5 - BUTTONDERRY FOREST**

Students as part of the nature trail will learn finally about the history of the local vegetation community characteristic of the site (the Buttonderry Footslopes Forest).

**PART 2 - SHADE ECOLOGIES**

Continuing along the trail the students will learn about the variety of flora that thrives in cooler parts of the local ecological system.

**PART 4 - WATER MANAGEMENT**

The way water is captured and treated within the site is on display through dry creek bed and rain gardens.

**PART 6 - REFLECTIONS**

Students can learn and reflect through a hands on gathering within a natural setting about the bush.
