

Wentworth Point new high school

Works notification | 9 May 2023

Second tower crane delivery and installation 19 to 21 May 2023

The next stage of works to deliver Wentworth Point new high school will require the delivery and installation of a second tower crane.

Delivery of the crane parts are expected to take place during usual working hours between 7 am and 6 pm on Friday 19 May 2023, avoiding peak school traffic times where possible. Traffic management will be in place for the deliveries.

The installation of the crane on site will take place on the weekend of 20 and 21 May 2023, between the hours of 8 am and 4 pm. We have chosen to complete these works on the weekend to minimise the risk to site workers, who usually work Monday to Friday.

Should there be any delays due to inclement weather, the installation will take place on the following weekend, 27 and 28 May 2023.

Potholing for utilities on site boundary 23 May to 2 June 2023

Potholing is required to confirm the location of gas services and will be undertaken in two locations outside the site boundary from 23 May to 2 June 2023. This will take place during usual working hours between 7am and 6pm, Monday to Friday only. Refer to image below.

There may be some additional noise created during this work, but live noise monitoring equipment is installed to ensure works are taking place within the allowable range. The existing detour for pedestrians will remain unchanged.

Thank you for your patience while we deliver this important new school infrastructure.
