

# Wentworth Point new high school

Works notification | 23 November 2023

As part of the NSW Government's plan to rebuild essential services targeted investment is being made in public education. As part of this plan, a project is underway build a new high school in Wentworth Point.

## Temporary lane and roundabout impacts on Burroway Road from 27 November to 11 December 2023

The installation of the critical water and wastewater infrastructure for the new high school is being completed.

Works will begin on Monday 27 November 2023 and continue for approximately one week. Most of the works will take place during usual construction hours, Monday to Friday between 7 am and 6 pm. There will be one overnight shift during this period.

It is anticipated that all work will be finished by Monday 11 December 2023, weather permitting. There may be some additional noise created by this work.

The work will have temporary impacts to a section of Burroway Road. This includes changes to pedestrian access, partial road, roundabout and footpath closures and the temporary loss of the two short term parking spaces alongside Wentworth Point Public School.

At some times during the construction hours, drivers will not be able to do a U-turn utilising the roundabout. See the map overleaf of the work area.

Traffic management will be in place to divert traffic safely around the road closures, roundabout and existing pedestrian closures. This includes dedicated traffic controllers during work hours, signage and barriers.

At the start of each shift, the construction zone and traffic control will be set up to close the section of the road. Outside of the construction hours, the trenches will be covered with road plates allowing the road and roundabout to return to normal function. Access to Burroway Road and Wentworth Place will remain open.

This is a continuation of the works previously notified on **20 October 2023**. This work was originally scheduled to start Monday 13 November but has been delayed.

Drivers are encouraged to adhere to all traffic management and road signage for safety of the community.
