

# Wentworth Point new high school

Works notification | 15 May 2024

## Upcoming weekend work on Burroway Road and ongoing lane closures

The construction of the new high school in Wentworth Point is nearing completion.

Work has been taking place on the façade of the building this week using boom lifts to access the outside of the windows.

The completion of this work will require work on Saturday 18 & 25 May 2024. Work will take place between the hours of 8am to 4pm.

The boom lifts are located in the closed lane of Burroway Road, requiring ongoing lane closure and traffic management to continue as per the previously issued map below. These closures will remain in place until early June when the final line markings will be completed.

Throughout these works traffic management will be in place to ensure traffic is safely diverted around the road closures, roundabout, and to assist with pedestrian closures. This will include dedicated traffic controllers during work hours, and signage and barriers being installed around the work zone.

Please be assured that access to Burroway Road and Wentworth Place will remain open at all times.

Drivers are encouraged to adhere to all traffic management and road signage for the safety of the community.
