

Wentworth Point new high school

Works notification | 10 April 2024

Roundabout traffic control on Burroway Road

The works on Burroway Road have commenced to build the raised pedestrian crossing for the new high school in Wentworth Point as per our [works notification issued 15 February 2024](#).

During daytime work hours this is managed by traffic controllers, but we have now implemented a traffic light system for use on weekends and at night.

Last weekend was the first time this system had been operated in daytime hours. Traffic levels are higher during this timeframe and there were significant delays for some motorists. This was due to the lights being on a timer that did not take weekend traffic conditions into consideration.

As a result of last weekend's delays, we have amended the traffic control plan to add an additional traffic controller. With the increase to two controllers the traffic lights will be manually operated to better manage the traffic flow.

Drivers are encouraged to adhere to all traffic management and road signage for the safety of the community.

We apologise for any inconvenience caused to residents over the past weekend.
