Wentworthville Public School

Project update

September 2019

Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Wentworthville Public School

A project is planned to upgrade Wentworthville Public School. The project will deliver:

- 31 new permanent learning spaces
- a new hall and library
- a new special education area
- new administration and staff facilities
- new special program rooms.

Project summary

The State Significant Development application has been approved by the Department of Planning, Industry and Environment. The project will be completed in three stages, and is scheduled for completion in mid 2021.

The construction contract has been awarded to Grindley Construction, who are preparing to commence the project.

Next steps

The contractor will soon complete site investigations for the first stage of the project. The out of of hours school care club (OSH Club) will be temporarily relocated into the hall located in A Block for the duration of construction.

Keep updated

Regular updates will be provided to the school and local community throughout construction.

An information booth will be held in the coming term. We encourage parents, carers and community members to attend to ask questions about the project. Further details will be provided closer to the occasion.
