

# Willyama High School rebuild

## Planning update | June 2024

### Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$1.4 billion for new and upgraded schools in regional NSW. This targeted investment will ensure growing communities get access to a world class public education.

### Project overview

Willyama High School will be rebuilt on the existing high school site on the corner of Brooks & Murton St, Broken Hill. The school has been operating in temporary facilities located at the site of Broken Hill High School since Day 1 Term 2 and will continue to do so until the new facilities are rebuilt.

A total of 38 demountables have been installed at the temporary site to ensure students and staff can utilise all specialist and subject-specific facilities. Details of the temporary facilities are available in this [community update](#) which can be found in the library section of the new [project page](#).

Community consultation on the provision of public education in Broken Hill has now concluded and the results are currently being reviewed.

A dedicated project page has been published on the School Infrastructure website, which will be updated as the project progresses. Visit [edu.nsw.link/WillyamaHS](https://edu.nsw.link/WillyamaHS).

### Keep in touch

We are committed to working together with our school communities and stakeholders to deliver the best learning facilities for students.

## Willyama High School rebuild

The rebuild of Willyama High School is currently in **planning**. The information below takes you through the journey of upgrading or building a new school.

### Early planning

- Consideration and studies of demographic trends, education requirements, the condition of the existing school buildings, catchment boundaries, heritage requirements, transport links and partnership opportunities.
- Doing so means that we:
  - consider the needs of the local area now and into the future.
  - ensure the right school is designed for the community.
- An important step before an architect or other contractors are appointed and official community engagement commences.

### Planning

- Consultants such as architects and project managers are appointed.
- Investigation and review of site and development of master plan options.
- Master planning considers options for the general size, shape and form of buildings for a specific school site.
- A Project Reference Group (PRG) is established.
- Operational, educational and service delivery factors are understood and considered by the PRG.
  - A series of preliminary master plan options are considered along with the educational concept and design for the school.
  - A preferred concept design option is identified.
  - Once a preferred option is identified approval is needed in order to progress from planning through to project delivery.

### Delivery

- The construction works program to deliver the upgrade to the school is developed in collaboration with the school and where appropriate, the local community.
- Ongoing consultation with Principal, staff and other school users.
- Throughout detailed design and construction updates are provided to the local community.

### Approvals

- Workshops continue with school and local community to understand challenges and constraints and identify future requirements.
  - Engagement of technical specialists, local councils and other government agencies.
  - Statutory planning approval process.
  - Opportunity for local community to view and provide feedback upon submission of the Development Application.
  - Scope of work and concept design is further defined.
