Yass High School

Project update

June 2019

Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Yass High School

A project is underway to upgrade Yass High School. The upgrade will deliver six new permanent teaching and learning spaces devoted to a STEM (science, technology, engineering and mathematics) framework, three new seminar spaces, new covered outdoor areas, new staff study facilities and new landscaping and accessibility improvement works.

Progress summary

The main works construction tender has closed, and the contract has been awarded to Joss Construction. Site establishment has taken place to prepare the site for construction and involved the installation of fencing, shade cloth and site facilities. Sediment control measures have also been installed.

A temporary site access road has been completed which will be used for construction vehicles to enter and exit the site and minimise impacts on access for the school community.

Please see page 2 for the site plan for traffic management.

Next steps

Additional deliveries of construction material will commence from next week, as well as excavation works.

Construction hours for this project are Monday to Friday 7am – 5pm and Saturday 8am – 1pm.

We are here to make sure that work is completed safely and efficiently and we will minimise impacts on the community at every opportunity.

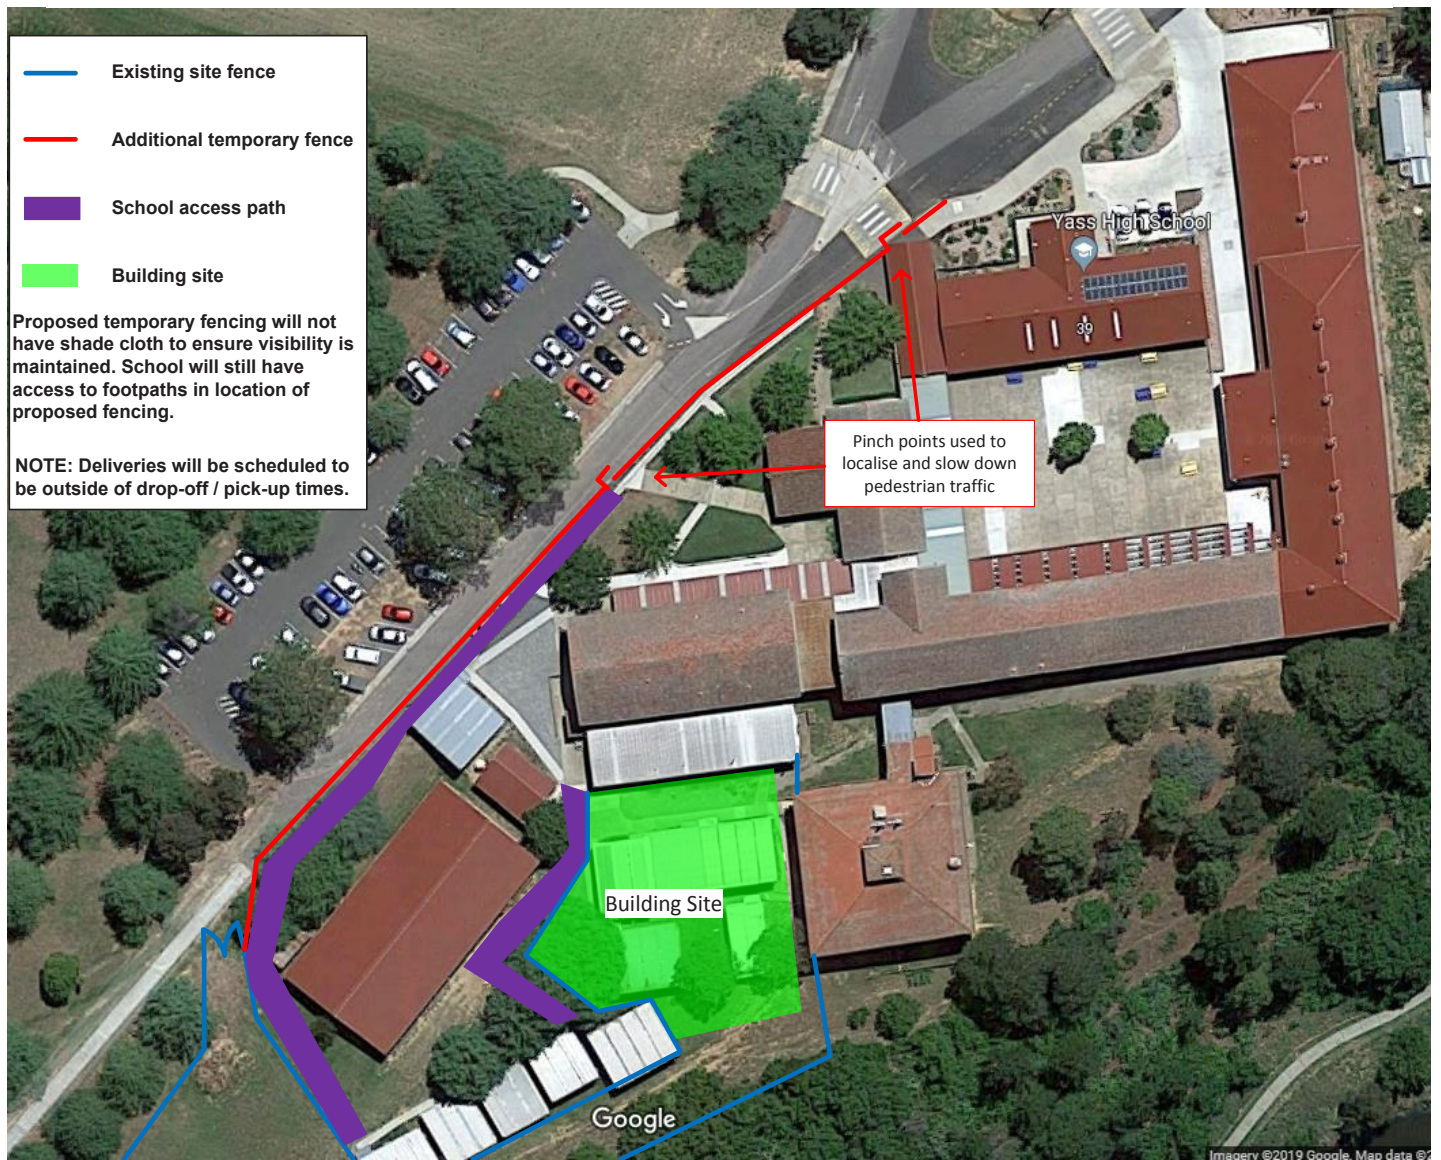

Stay updated

We will continue to work closely with the school community and other stakeholders and share regular updates as the project progresses. You can stay updated via the project page on our website – <https://www.schoolinfrastructure.nsw.gov.au/projects/y/yass-high-school.html>
