

Yass High School

Works notification

3 November 2021

A project is underway to upgrade Yass High School with a new multi-purpose hall. The hall will include a full-size basketball court, storage and amenities.

Joss Construction were recently awarded the design development and construct contract for the project. They have been working on detailed design and are ready to prepare the site for upcoming works.

Site Establishment

Joss Construction will begin to establish the site in November (in line with the latest NSW Public Health Orders) with fencing and shade cloth to be installed around the work zone. This will be followed by site sheds, which will be located within the work zone area (see map overleaf).

Next Steps

Once the site is established, the existing basketball court and covered outdoor learning area (COLA) will be demolished. Excavation works for the new building will then proceed, followed by civil, drainage, and foundation works. Construction of the new hall will then begin.

School Infrastructure NSW (SINSW) will work closely with the school leadership team to ensure continuity of school operations and to minimise any potential impact on student learning during construction. SINSW will also prepare notifications to neighbouring properties to keep them informed of the impact of school construction on the local area.

Working hours

Working hours are Monday to Saturday, 7 am to 5 pm. No work will occur on Sundays or public holidays, unless otherwise advised.

All work will be in accordance with NSW Government's Public Health Orders and current relevant COVID restrictions.

Thank you for your patience while we deliver this important school infrastructure.
