

# Young High School

## Works notification

**14 January 2021**

Dear Neighbour,

During earth works for the Young High School upgrade project, asbestos containing material was found in soil within the construction site. The material has been confirmed as bonded asbestos which means it cannot be crumbled by light pressure.

As a precaution, safety measures and air monitoring have been put in place to ensure there is no risk to the local community. Remediation work will take place on Friday 15 January 2021.

This area will be remediated in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing will be completed to ensure the area has been fully remediated. The project will receive a clearance certificate before construction work can resume in this area.

The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.
