

# Tumbulgum Public School

## Flood Recovery Update

29 March 2022

### Supporting flood impacted schools

The NSW Department of Education is coordinating an emergency response effort that is unprecedented in terms of scale and impact. A large number of schools in the Northern Rivers region have damage to either the entire site or some buildings and facilities.

### What is happening at Tumbulgum Public School

Most of the Tumbulgum Public School site was impacted by flood waters. One learning space in Block E was not affected. The school is currently closed for cleaning and remediation work, including:

- stripping and cleaning buildings
- checking plumbing and electrical
- putting up security fencing
- structural check of Block C.

### Current status

- Students are learning from Cudgen Public School, which has enough learning spaces for the extra children.
- Work has started to repair flood damaged facilities and provide some extra temporary buildings at Tumbulgum Public School so students can return to their usual site as soon as possible.
- The temporary administration building and staff toilet block have arrived on site and work has started to make them ready for use.

### Next steps

- Our current priority is to make sure all students and teachers in the region that have been displaced by flooding have suitable temporary accommodation, which are buildings used as teaching and learning spaces as well as other core facilities.
- Teams are working as quickly as possible, while prioritising the safety of our students, staff and contractors.
- Planning and due diligence is underway to understand the full scope of work required at the Tumbulgum Public School site to meet local needs for permanent education infrastructure.

We thank you for your patience as we work through this huge program of work. We will continue to share information with you as work progresses.

### What else is happening in the region

The School Infrastructure regional office has inspected all schools in flood impacted areas. We continue to work with emergency response organisations to remove rubbish, clean and secure affected sites.

Many school sites have been able to resume operating, while some students have been relocated to alternative sites so that their learning can continue. Our current priority is to source, deliver, install and handover temporary buildings to accommodate displaced students. The timing of all work and handover of temporary spaces is subject to local weather conditions.
