

Binda Public School

Works notification | 31 March 2026

Dear staff, parents, and carers,

As part of scheduled maintenance, we recently completed drinking water quality testing at Binda Public School.

This test is conducted twice a year by an independent hygienist as a precautionary measure at schools that use potable tank water.

The routine test was completed on Thursday 19 March 2026. The results, received on Thursday 26 March 2026, identified the presence of lead in the staff kitchen sink tap in Building D.

As a safety precaution, access to the affected areas have been restricted. Signage is in place to remind staff not to use this outlet. We are coordinating with your school to see if bottled water and hand sanitisers are required for students and staff.

Licensed and qualified contractors have been requested to attend site as a priority to carry out any necessary works. Once completed, follow-up water testing will be done by our independent hygienist to ensure the water is safe and meets [Australian Drinking Water Guidelines](#).

The health, safety, and wellbeing of all members of our school and local community remain our highest priorities. If you have any health concerns, please consult a healthcare professional or contact the [your local NSW Health Public Health Unit](#) on 1300 066 055.

If you have any questions about this process, please contact the NSW Department of Education.

Thank you for your understanding and support during this important work.
