

Binnaway Central School

Works notification | 24 February 2025

Dear staff, parents and carers,

During work to repair the flooring of Building E on Wednesday 19 February 2025 at Binnaway Central School the contractor noticed a piece of fibro suspected to contain bonded asbestos in the sub floor.

Work was stopped and the classroom where the work was occurring was restricted.

NSW Health explains that “living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged”.

An independent hygienist will be scheduled to remove the piece of fibro for testing and inspect the subfloor area next week before providing remediation advice.

Due to the ongoing structural work in Building E, there is no further impact on school operations.

The health, safety, and wellbeing of the school and the local community is our highest priority. We will keep the community updated.

Thank you for your cooperation during this important work.
