

Cabramatta Public School

Works notification | 5 August 2024

Dear staff, students, parents and carers,

During planned work to replace air conditioning units at Cabramatta Public School on 2 August 2024, suspected asbestos-containing materials were found in the wall of a community-use demountable classroom.

The walls, which are assumed to contain asbestos as listed in the school's asbestos register, were immediately sealed with plastic and classroom access was restricted.

Community classes were relocated to other rooms in the school.

An independent hygienist visited school on Monday 5 August to test the materials and provide advice on any remediation work required.

Any work required will be done outside of school hours, in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan.

All work will be completed by licensed and accredited asbestos contractors and monitored by independent hygienists in strict accordance with all applicable legislation, regulations, policies, and guidelines.

We will keep the community updated.

The health and wellbeing of students, staff and the local community is our highest priority.

Thank you for your cooperation during this important work.
