

# Canley Vale Public School

## Works notification | 22 August 2025

Dear staff, parents and carers,

A staff member reported a hole in the wall of a classroom in Building F at Canley Vale Public School on Wednesday 13 August 2025.

The wall cavity is known to contain bonded asbestos as per the school's asbestos register.

The room was locked as a precaution with students and staff relocated to another classroom on the school site.

NSW Health explains that "living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged".

A contractor and independent hygienist inspected the damage on Thursday 14 August 2025 and recommended the replacement of the wall and removal of the asbestos-containing material.

This work has been scheduled to be completed on Saturday 23 August 2025.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done. All work will be completed by licensed asbestos contractors.

All work involving asbestos-containing materials will take place outside of school hours.

The room will be inspected by the independent hygienist to confirm it has been fully remediated, and a clearance certificate will be issued before the room is reopened.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
