

Captain's Flat Public School

Works notification | 20 February 2025

Dear neighbours,

We will be undertaking lead remediation and encapsulation work on the Department of Education-owned site at 186 Foxlow Street near Captain's Flat Public School.

The site has been identified as containing lead through testing by an independent hygienist. To prevent weed growth and minimise the need for grounds maintenance, the location will be covered in geofabric and topped with road base in line with the site specific lead management plan.

The [NSW Government Captains Flat Lead Management taskforce website](#) provides further information regarding lead management in the area.

This work will begin on Friday 21 February 2025 and is scheduled to be completed by the end of business on Friday 7 March 2025. Work will be undertaken outside the operating hours of the preschool next door.

Safety precautions such as water spraying, machinery with enclosed cabins, personal protective equipment and decontamination facilities will be in place while lead remediation work is underway.

All work will be done in accordance with work, health and safety laws. All work will be completed by licensed contractors and monitored by independent hygienists.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
