

Cassilis Public School

Works notification | 16 August 2024

Dear staff, parents and carers,

As part of the work to repair the Building C foundations at Cassilis Public School, contractors have been using excavators.

On Wednesday, 13 August, an excavator made contact with a gas supply line while digging a shallow trench near Building C.

The gas line was temporarily isolated and, as a precaution, the school community was evacuated and back onsite the same day.

Nobody was injured because of this event.

We engaged a qualified and licensed gas repair professional to repair the line and they have now permanently isolated the gas line.

There was no delay or additional work required for the foundation repair work because of this incident.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
