

# Cessnock Public School

Works notification | 4 April 2024

Dear staff and parents/carers,

During a recent routine inspection at Cessnock Public School, a hole was found in the wall, suspected to be asbestos containing material, inside the support unit classroom in Building D.

As a precaution, the room was isolated from students and staff and air monitoring put in place until testing could be done.

An independent hygienist undertook testing on 18 March 2024, and the results confirmed that the material is negative for asbestos.

The wall was repaired, and the room has been reopened for use.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
