

# Coffee Camp Public School

## Works notification | 2 July 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Coffee Camp Public School as part of our routine water testing program.

Findings have detected bacteria in samples collected from tap outlets at the following locations:

- practical activities area sinks, north and south, in Building E
- staff kitchen sink located in the library demountable.

As a precautionary safety measure, access has been restricted to the taps and signage is in place to remind students and teachers not to access the taps. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water can continue to be used.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
