

Dudley Public School

Works notification

21 September 2022

Dear staff and parents/carers,

As notified in the project update distributed on 1 September 2022, early works associated with the remediation of contaminated soils at Dudley Public School will take place during the upcoming school holidays.

The work will involve extending the existing concrete basketball court and associated stormwater management works.

Some additional soil testing of the fenced off area of the school site will also be completed during the school holidays between Saturday 24 September and Sunday 9 October 2022. All asbestos containing material will be removed in accordance with the advice of the independent hygienist.

All works areas will be cordoned off and safety measures and monitoring put in place before works start. The areas will remain out of bounds to students and staff until the remediation and associated stormwater management work is completed.

This area will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

All works areas will be inspected to ensure they have been fully remediated. The school will receive a clearance certificate before the area is open to students and staff for Term 4.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
