

Emmaville Central Public School

Works notification | 3 March 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Emmaville Central Public School as part of our routine water testing program.

Findings have detected traces of copper in samples collected from the Building F and G bubblers.

Access has been restricted and signage has been installed to remind students and staff not to use the affected bubblers.

The school has been provided with hand sanitiser for handwashing.

We are working with an independent hygienist to undertake the required remediation work.

Work will be carried out by qualified and licenced contractors.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
