

# The Entrance Public School

## School holiday works notification | June 2023

School Infrastructure NSW regularly inspects and maintains school infrastructure as part of a comprehensive and ongoing program to keep school assets in optimal condition and ensure the safety and wellbeing of our school community across more than 2,200 NSW schools.

The school holidays are the ideal time for some maintenance projects as it means work can take place without disrupting learning.

Planned maintenance over the holidays may involve working with hazardous materials such as asbestos or lead containing material. This is to notify you of this work.

### Planned maintenance over the winter school holidays

We are upgrading the playground located to the northern end of the school near the preschool facilities building (Building R), which will involve the removal of asbestos located in the ground, under the covered outdoor learning area.

The area is cordoned off and covered by geofabric with air monitoring in place.

Work to remove the asbestos will take place **during the July school holidays, from the end of school on Friday 30 June to Monday 17 July 2023.**

The work area will continue to be separated by fencing around the perimeter with additional safety measures and monitoring in place during remediation work.

Work will be done in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The playground will be inspected to ensure it is fully remediated and the contractor will receive a clearance certificate before work continues.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.

If you have any questions about the work, please contact us on the details below.
