Eungai Public School

Works notification | 17 October 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Eungai Public School as part of our routine water testing program.

Findings have detected traces of copper and lead in samples collected from bubblers outside the student toilets and near the lower sports field.

As a precautionary safety measure, access has been restricted to these bubblers. Signage is in place to remind students and staff not to access the tap.

Bottled water is being supplied for staff and students as needed. We are working with an independent hygienist to undertake any remediation work required swiftly so that affected water outlets are ready for students to use again as soon as possible.

All work will be carried out by qualified contractors. When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the Australian Drinking Water Guidelines.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
