Eungai Public School
Works notification | 4 March 2025

Dear staff, parents and carers,

We'd like to provide you an update on the results of the broken fibro sheeting found in a storage shed at Eungai Public School.

Following our notification on 6 February 2025, testing has confirmed the sheeting contains bonded asbestos.

NSW Health explains that 'living or working with asbestos, or just being around it, is a low risk to your health as long as the asbestos is in good condition and not damaged'.

Work to remove the sheeting and remediate the shed is scheduled to take place on Saturday 15 March 2025.

All work involving asbestos-containing materials will take place outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while work is being done.

All work will be completed by licensed asbestos contractors and monitored by independent hygienists.

The shed will be inspected by the independent hygienist to confirm it has been fully remediated, and a clearance certificate will be issued before it is reopened.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
