Glenorie Public School
Works notification | 14 August 2025

Dear staff, parents, carers and neighbours,

In the works notification from 21 July 2025, we notified that we isolated an outdoor area located between the front fence on Old Northern Road and Building B at Glenorie Public School due to a sewage leak.

Additional testing done by Sydney Water has returned positive results for E.coli, however the levels are considered low risk and acceptable as determined by Sydney Water standards and specifications. Due to this, we will no longer be removing soil, however our plan to add fresh soil and turf to ensure the safety of staff and students has not changed.

The exclusion zone and barrier are still in place and will remain until the turf has been established.

There are no changes to school operations or to the outside of school hours (OOSH) service. School and building access, drop-off zones and staff car parking remain unaffected.

Following this work the hygienist will inspect and test the outdoor area before it is reopened.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Notification issued 21 July 2025

Dear staff, parents, carers and neighbours,

As we notified on 4 July 2025 (below), we isolated an outdoor area, located between the front fence on Old Northern Road and Building B at Glenorie Public School due to a sewage leak.

An exclusion zone was installed by Sydney Water. As a precaution and based on advice from the independent hygienist and Sydney Water, we have extended the exclusion zone affected by the sewage leak for areas of soil to be excavated.

There will be no changes to school operations or to the outside of school hours (OOSH) service. School and building access, drop-off zones and staff car parking are not affected.

Following soil excavation work, fresh soil and turf will be laid within the grassed area in coming days. This area will remain cordoned off until the turf has been established.

Following this work the hygienist will inspect and clear the outdoor area before it is reopened.

Earlier in July, Sydney Water repaired the broken pipe, cleaned all hard surfaces and added fresh topsoil.

The health, safety and wellbeing of all members of our school and the local community are our highest priorities.
