

Glenquarry Public School

Works notification | 28 August 2025

Dear staff, parents and carers,

We are pleased to advise that Glenquarry Public School can now safely use tap water for drinking following ongoing water quality testing and multiple remediation projects.

We have completed all necessary remediation including:

- cleaning the water tanks
- replacing the UV filter system
- flushed water lines and pipes
- replacing all above ground water pipes
- replacing all bubblers at the school.

Testing of the affected tap outlets in the Building C bubblers, demountable staffroom, Building E classroom and the Building A kitchen by an independent hygienist in July 2025 has returned results which meet the requirements of the Australian Drinking Water Guidelines.

Access to the tap outlets will be restored and signage preventing the use of these taps will be removed.

The health and wellbeing of students, staff and the local community is our highest priority.

Thank you for your cooperation during this important work.
