

Goulburn Public School

Works notification | 1 May 2025

Dear staff, parents and carers,

During the recent school holidays we continued the testing, investigation and remediation of the bottom floor of Building B at Goulburn Public School that we began at the [start of April 2025](#).

We will be completing more remediation including:

- replacement of flooring in the hallway and one classroom
- roof repairs
- replacement of gutters, downpipes and section of sewer pipes
- removal of non-functioning water tanks
- installation of additional stormwater drains.

This work will begin on Monday 5 May 2025.

The bottom floor of Building B will remain inaccessible until this work is completed and an independent hygienist confirms it has been fully remediated with a clearance certificate being issued.

Classes will continue operating from alternate learning spaces within the school.

It is expected this work will be completed mid-year.

The health, safety and wellbeing of all members of our school and the local community are our highest priority.

Thank you for your cooperation during this important work.
