

Gundaroo Public School

Works notification | 28 April 2025

Dear staff, parents and carers,

Following staff reports of an unpleasant smell in the playground, a blockage was identified in the septic tank at Gundaroo Public School on Tuesday 2 April 2025.

The student toilets were made inaccessible and temporary facilities were installed near the toilet block the following day.

Following advice from an independent waste management expert, we will be installing a new septic wastewater treatment system during Term 2.

This work will involve:

- removing the current septic system including pipes, drains and absorption trench
- digging a new absorption trench
- installing new pipes, drains and a new system laying top soil and turf, after installation.

A contractor will be appointed in the coming weeks following a tender process.

Students will continue to use the alternative toilet facilities until the work is complete.

What to expect

Trenching and excavation will take place behind the student toilet block.

The area will be partly fenced temporarily during construction.

We will keep the community updated with the latest information, including any changes to school operations, after our contractor is appointed. We anticipate work will be complete in Term 3, weather and other conditions permitting.

For more information on how construction impacts will be managed, please scan the QR code or visit the School Infrastructure website: [Managing construction impacts in your community](#).
