

Hammondville Public School

Works notification | 27 November 2024

Dear staff, parents and carers,

Fragments of building material have been found during in a grassed area near the Watson Street entrance at Hammondville Public School on Friday 22 November 2024.

These fragments were found in a location known to contain asbestos in the ground, which is managed through the school's site-specific asbestos management plan.

The area was immediately fenced off and made out of bounds.

A licensed and accredited asbestos contractor removed the pieces, outside of school hours on Friday 22 November and Saturday 23 November, under the supervision of an independent hygienist, in strict compliance with all relevant legislation, regulations, and guidelines.

Safety measures, including air monitoring, were in place while work was carried out.

All work was done in accordance with work, health and safety laws and the NSW Department of Education's Asbestos Management Plan.

The hygienist issued a clearance certificate and the area was reopened yesterday (Monday 25 November).

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
