

Telarah Public School

Works notification | 9 June 2026

Dear staff, parents and carers,

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

On Wednesday 3 June 2026, a cracked window was identified in a Building C classroom at Telarah Public School.

The putty material in this window is known to contain bonded asbestos, as listed on the School Asbestos Management Plan.

The glass was immediately secured and an independent hygienist was engaged to conduct air monitoring and provide advice. The putty material is currently undisturbed and in good condition.

All air monitoring to date across the site has returned results below the minimum detectable limit, which means it is consistent with acceptable levels in ambient air (i.e. <0.01 fibres/mL) as per SafeWork NSW guidelines.

Work to remove the asbestos-containing material and replace the glass will take during the winter school holidays, which may include from the end of the school day on Friday 3 July 2026 up to the first day of Term 3 Tuesday 21 July 2026.

All work will be done in accordance with work, health and safety laws. All work will be completed by experienced contractors and inspected by independent hygienists.

If you have any questions about this, please contact the NSW Department of Education on the details below.

Thank you for your understanding and support during this important work.
