

NSW Department of Education
Huntingdon Public School
Works notification | 24 May 2024

Dear staff,

Drinking water quality testing was recently conducted at Huntingdon Public School as part of our routine water testing program.

Findings have detected some bacteria in samples collected from the staff kitchen tap.

Precautionary safety measures have been put in place and access has been restricted to the tap. Signage is also in place to remind staff not to use the outlet.

We are working with an independent hygienist to undertake any remediation work required. All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water is safe for use. We will provide an update once we have confirmation of the details of this work.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
