

Hurstville Public School

Works notification | 24 July 2024

Dear staff and parents/carers,

On Tuesday 23 July 2024, 3 demountable classrooms were removed from Hurstville Public School and transported to a storage facility.

The demountables were considered surplus to the school's needs and contained undisturbed asbestos, which was noted in the school's asbestos register.

The work took place before school hours to avoid disruption to student learning.

As a requirement of transportation, the contractor, ProGroup, placed a precautionary asbestos warning sign on the fencing.

There was no asbestos removal work done on the buildings. The demountable removal was done under the safe work conditions for releasing buildings from a school site, which requires stickers to be attached notifying that the buildings contain asbestos during transport.

The health, safety and wellbeing of the school and local community is our highest priority.

If you have any questions or concerns regarding the removal of demountables at Hurstville Public School, please contact the NSW Department of Education during business hours via the contact details below.

Thank you for your cooperation during this important work.
