

NSW Department of Education
Iona Public School
Works notification | 6 June 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Iona Public School as part of our routine water testing program.

Findings have detected bacteria in samples collected from the kitchen sink located in the staff area of Building D which is also used for the canteen.

As a precautionary safety measure, access has been restricted to the tap. Bottled water is being supplied as an alternative for students and staff for drinking and handwashing as required. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water is safe for use. We will provide an update once we have confirmation of the details of this work.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
