

Ivanhoe Central School

Works notification | 13 March 2025

Dear staff, parents and carers,

Throughout Term 1 2025, we have continued work on the installation of the new aerated wastewater treatment system at Ivanhoe Central School.

Installation of the new wastewater system has been completed alongside the removal of 2 trees, installation of a new irrigation system and relaying of turf.

The school oval is now open and available for use by the school.

The school's toilets will be switched to the new wastewater treatment system on Friday 21 March 2025.

The area around the septic tanks will continue to be cordoned off with temporary fencing until the old system is removed by the end of March 2025.

Once the old septic tanks are removed, all temporary fencing, worksite signage and services will be removed.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation as we completed this important work.
