

Fernleigh Public School

Works notification | 20 August 2024

Dear staff, parents and carers,

Further to the [Works Notification on 19 June](#) regarding the drinking water quality test results for Fernleigh Public School, remediation work has been completed by a qualified and accredited tradesperson following advice by an independent hygienist.

Re-testing of the affected tap outlets by an independent hygienist has returned results that meet the requirements of the [Australian Drinking Water Guidelines](#).

Access to the tap outlets in the following locations has been restored and can be used again by students and staff:

- bubblers located in Building C
- tap located in the canteen in Building D.

The tap outlets in the staff change room and staff kitchen in Building A require additional work before access can be restored. This is due to the sample not meeting the requirements of the [Australian Drinking Water Guidelines](#) after the initial cleaning, disinfection, and re-testing.

The health and wellbeing of students, staff and the local community is our highest priority.

We will keep the community updated.

Thank you for your cooperation during this important work.
