

Kincumber Public School

Project update

September 2022

Project overview

In April 2021, a fire destroyed the school hall at Kincumber Public School. A new facility is being built to replace the spaces that were lost in the fire. The new building roof will be extended to include an additional Covered Outdoor Learning Area (COLA) to the school.

Additional works to the school are also taking place at a similar time to the hall, including installing a new storage shed for ongoing general maintenance and an upgrade to the school car park and front of school entry to provide a safe entry and exit point for students, staff and visitors.

Progress summary

We would like to update the community about the three different works at Kincumber Public School:

- The construction contract for the refurbishment of the school hall has been awarded to Axis Construction. Site establishment work has started and work will continue for the remainder of the year.
- Work on the new storage shed has also started. This work is being carried out by Mid-Coast Sheds. Ground remediation works have been completed and the concrete slab has been poured. The shed is expected to be completed in September to safely store equipment from the hall during construction.
- The car park upgrade will be undertaken by a separate contractor. The Department is consulting with the Central Coast Council and the project is now in the final design phase. Construction is expected to start towards the end of Term 4, subject to planning approval.

There will be reduced carparking during construction within school grounds and in the surrounding streets. We will continue to work with the school to minimise disruption to students and staff during this time.

Working hours

Construction work hours will be 7 am to 6 pm Monday to Friday and 8 am to 1 pm on Saturdays. No work will take place on Sundays or public holidays unless otherwise notified.

We are here to make sure that the works are completed safely and efficiently, with minimal impact on the community.

Thank you for your cooperation while we deliver this important school infrastructure.
