

Kincumber Public School

Works notification

16 September 2022

Dear staff and parents/carers,

As part of the hall refurbishment works at Kincumber Public School, work is required to relocate the existing fire booster valve closer to the frontage of the school. This will involve working with asbestos containing material located in grounds.

Work will take place during the upcoming school holidays between Monday 26 September and Monday 10 October 2022. All asbestos containing material will be removed in accordance with the advice of the independent hygienist.

The area will be cordoned off before works start, and safety measures and monitoring put in place. The works will be completed under controlled conditions including Geotech encapsulation. The area will remain out of bounds to students and staff until the removal and associated maintenance work is completed.

This area will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

The area will be inspected to ensure it has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff.

The health, safety, and wellbeing of the school and the local community is our highest priority.

Thank you for your cooperation during this important work.
