

Laggan Public School

Works notification | 14 May 2026

Dear staff, parents, and carers,

The health, safety, and wellbeing of all members of our school and local community remain our highest priorities.

As part of scheduled maintenance, we recently completed drinking water quality testing at Laggan Public School.

This test is conducted twice a year by an independent hygienist as a precautionary measure at schools that use potable tank water.

The routine test was completed on Friday 24 April 2026. The results, received on Wednesday 6 May 2026, identified the presence of copper in the following locations:

- boys' toilet in Building C
- sink tap in Hall of Building F.

As a safety precaution, access to the affected taps has been restricted. Signage is in place to remind students and staff not to use these outlets. We are coordinating with your school to see if bottled water and hand sanitisers are required for students and staff.

Licensed and qualified contractors have been requested to attend site as a priority to carry out any necessary works. Once completed, follow-up water testing will be done by our independent hygienist to ensure the water is safe and meets [Australian Drinking Water Guidelines](#).

If you have any health concerns, please consult a healthcare professional or contact the [your local NSW Health Public Health Unit](#) on 1300 066 055.

For more information about the program, please visit [Water Quality Assurance Program](#) or scan the QR code.

If you have any questions about this process, please contact the NSW Department of Education.

Thank you for your understanding and support during this important work.
