

Laggan Public School

Works notification | DD November 2025

Dear staff, parents, and carers,

Laggan Public School is part of the ongoing water quality assurance program with the NSW Department of Education to ensure the safety and wellbeing of our school community.

In accordance with the program, water quality testing of your school's drinking water tanks was recently conducted.

This biannual routine testing was carried out on Wednesday 5 November 2025. The results, received on Monday 17th November 2025 identified contamination in the tank water supply used at the school.

Testing confirmed the presence of copper in the following locations:

- sink in the boys toilets in building C
- tap to sink in the hall in building F.

As a precautionary safety measure, access to the affected sink outlets have been restricted. Signage is in place to remind students and staff not to use these the sinks. Bottled water and hand sanitiser is being supplied to staff and students as needed.

We are working with an independent hygienist to undertake any necessary remediation work. All remediation works will be carried out by qualified contractors, and additional testing will be conducted following this work to ensure the water is safe for use.

The health, safety, and wellbeing of our school community remain our highest priority.

For more information on town water quality and safety measures, please visit Australian Drinking Water website: [Australian Drinking Water Guidelines](#).

If you have any questions about this process, please contact the NSW Department of Education using the details below.

Thank you for your cooperation during this important work.
