# Laguna Public School
## Works notification | 5 July 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Laguna Public School as part of our routine water testing program.

Findings have detected lead in samples collected from a water tank located on the southern side of Building A.

As a precautionary safety measure, access has been restricted to the tap outlet and signage is in place to remind students and staff not to access the tap. Bottled water is being supplied for students and teachers as required.

The water tank has been isolated and will be replaced. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water can continue to be used.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
