

Maimuru Public School

Works notification | 26 March 2025

Dear staff,

Drinking water quality testing was recently conducted at Maimuru Public School as part of our routine water testing program.

Findings have detected lead in samples collected from a tap in the administration sink in the demountable building.

As a precautionary safety measure, access has been restricted and signage is in place to remind students and staff not to access the tap. The school will be provided with bottled drinking water as needed.

We are working with an independent hygienist to undertake any remediation work required.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

Please see a healthcare professional if you have any concerns, or contact [your local NSW Health Public Health Unit](#) for advice on 1300 066 055.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
