

Manifold Public School

Works notification | 5 July 2024

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Manifold Public School as part of our routine water testing program.

Findings have detected bacteria in samples collected from the the following locations:

- canteen sink tap in Building B
- handbasin tap in the boys' toilet building
- sink tap in the administration/library building
- water tank external tap, near Building F.

As a precautionary safety measure, access has been restricted to the tap outlets and signage is in place to remind students and staff not to access the outlets. We are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water can continue to be used.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
