

Marulan Public School

Works notification | 17 October 2025

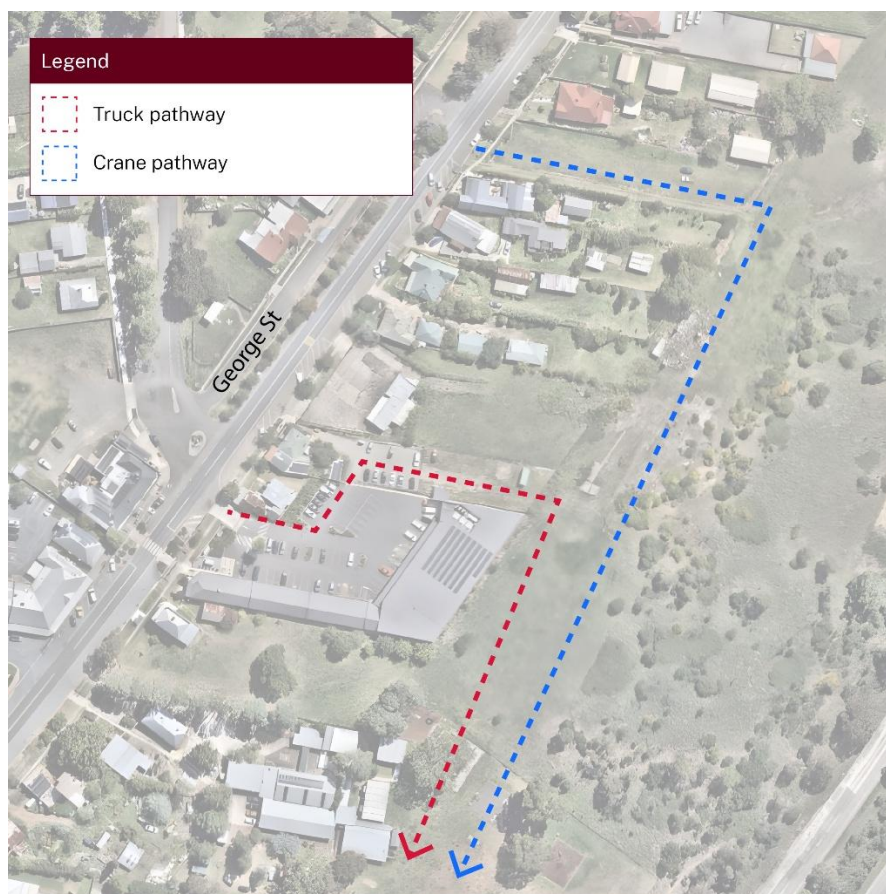

Dear staff, parents, carers,

We are writing to provide you with an update on the new demountable building installation at Marulan Public School that was due to take place during the recent Spring School Holidays. At this stage, the works is running behind the timeline we outlined in our [September 2025](#) notification due to contractor availability.

To ensure the most practical access and use of space, the access route for the demountable building to enter the school site will run through 2 privately owned properties on George Street, Marulan. The transport vehicles will arrive at the rear of Building A on Thursday 23 October 2025. Installation will begin shortly afterwards, with all work expected to be completed by early November 2025.

Installation access and vehicle movements

The installation access route passes through 2 private properties on George Street, Marulan, with agreements in place with property owners. The delivery company of the demountable will manage the transport and installation via these access points.

What to expect

During the work, there will be construction noise due to the use of heavy machinery, including cranes, trucks, and delivery vehicles. An increase in truck and contractor vehicle movements can be expected along George Street and nearby areas.

Contractors will monitor the noise levels and have mitigation measures to minimise disruption throughout the work.

There will be no disruption to school operations as the contractors will work only during the school breaks.

Traffic

We apologise in advance for any inconvenience this work may cause. Please be mindful of construction traffic and observe all temporary signage and directions from traffic controllers to ensure the safety of students, staff, and neighbours.

Work hours

Work will take place between 8 am and 4 pm on weekdays. The installation is expected to be completed within this timeframe, weather and site conditions permitting.

All work will be managed carefully to avoid disruption to surrounding neighbours and businesses.

Thank you for your understanding and patience during this important project.
