

Mendooran Central School

Works notification | 26 March 2025

Dear staff, parents and carers,

Drinking water quality testing was recently conducted at Mendooran Central School as part of our routine water testing program.

Findings have detected copper and lead in samples collected from the bubblers north of Building F.

As a precautionary safety measure, access has been restricted to the tap outlets.

Signage is in place to remind students and staff not to access the tap.

Bottled water is being supplied for staff and students as needed.

When work is complete, the independent hygienist will re-test the outlets to ensure the water meets the requirements of the [Australian Drinking Water Guidelines](#).

The health, safety and wellbeing of the school and the local community is our highest priority.

Please see a healthcare professional if you have any concerns or contact [your local NSW Health Public Health Unit](#) for advice on 1300 066 055.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
