

Michelago Public School

Works notification | 13 October 2026

Dear staff, parents, and carers,

As part of our commitment to the health, safety, and wellbeing of all members of our school and local community, we recently finished drinking water quality testing at Michelago Public School.

The [Water Quality Assurance Program](#) (QAP) is an important ongoing initiative led by School Infrastructure to ensure all public schools in NSW with tank water supplies maintain safe, reliable and compliant drinking water systems. It involves engaging independent hygienists to carry out testing twice a year at schools that use potable tank water.

The routine test was carried out on Tuesday 22 September 2026. Results received on Tuesday 6 October 2026 showed lead was found in the water sample taken from the administration office and communal area in Building A.

Signs are in place to remind students and staff not to use this outlet, the outlet has been isolated and currently not in use. No other drinking water outlets are affected at this time. Bottled water and hand sanitiser is available for students and staff.

As a priority, licensed and qualified contractors will attend the school to carry out necessary works.

Once this is finished, an independent hygienist will conduct follow-up water testing to ensure the water is safe and meets [Australian Drinking Water Guidelines](#).

If you have any health concerns, please consult a healthcare professional or contact [your local NSW Health Public Health Unit](#) on 1300 066 055.

If you have any questions about this testing, please contact the NSW Department of Education using the details below.

For more information about the program, please visit [Water Quality Assurance Program](#) or scan the QR code.

Thank you for your understanding and support during this important work.
