NSW Department of Education

Milbrodale Public School

Works notification | 5 June 2024

Dear staff, parents/carers,

Drinking water quality testing was recently conducted at Milbrodale Public School as part of our routine water testing program.

Findings have detected lead in samples collected from the sink tap located in the Practical Activities Area in Building A.

As a precautionary safety measure, access has been restricted to the tap and we are working with an independent hygienist to undertake any remediation work required.

All work will be carried out by qualified contractors, and we will undertake additional testing at the school following the work to ensure the water is safe for use. We will provide an update once we have confirmation of the details of this work.

The health, safety and wellbeing of the school and the local community is our highest priority.

If you have any questions about this work, please contact the NSW Department of Education on the details below.

Thank you for your cooperation during this important work.
