

Moss Vale Public School

Works notification | 27 October 2025

Dear staff, parents and carers,

We are preparing to clean out the roof void in Building C at Moss Vale Public School after possums were removed and returned to their natural habitat in September 2025.

Before this cleaning can occur, we will be completing precautionary testing for the presence of asbestos-containing material in the roof void on Wednesday 29 October and Thursday 30 October 2025 after school hours. The precautionary testing has been scheduled due to the age of the building and due to the known presence of asbestos in sheeting material as per the school's asbestos management plan.

All work involving suspected asbestos-containing materials will take place outside of school hours.

All work will be done in accordance with work health and safety laws and the NSW Department of Education's Asbestos Management Plan. Safety measures will be in place while testing is being completed by an independent hygienist.

The independent hygienist will advise when the roof void can be accessed and a clearance certificate will be issued before cleaning begins.

The health, safety, and wellbeing of all members of our school and the local community are our highest priorities.

Thank you for your cooperation during this important work.
