

Mount Hunter Public School

Works notification | 15 June 2023

Dear staff and parents/carers,

As we advised on 30 May, further water quality testing has been conducted at Mount Hunter Public School.

We have now received the results which confirm the school's drinking water meets all health requirements for the Australian Drinking Water Guidelines.

The independent occupational hygienist has advised that the library sink in Block E is now safe for use and provided the school with a clearance certificate for normal drinking arrangements to resume.

Regular inspections and testing of the school's water supply will continue to be carried out in the future as part of School Infrastructure NSW's maintenance program.

The health, safety and wellbeing of the school and the local community is our highest priority.

Thank you for your patience and understanding during this important work.
